

Specimen Label

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe,

- Apply this product only through one or more of the following types of systems: sprinkler, including center pivot, lateral move, traveler, big gun, or plastic pipe solid set system(s) which contain no aluminum parts or components. Do not apply this product through any other type of irrigation system.
- While volume is important in obtaining full spray coverage, often factors such as foliage density, environmental conditions and sprayer calibration have a greater impact. Always be sure that sprayers are calibrated to spray equipment manufacturer's specifications and environmental conditions are within those recommended by State and local regulatory authorities.
- When mixing, fill the spray tank one-half full with water. Add CuPRO slowly to tank while hydraulic or mechanical agitation is operating and continue filling with water. **DO NOT PRE-MIX or SLURRY CuPRO.** Spreaders, stickers, insecticides, nutrients, etc. should be added last. If compatibility is in question, use the Compatibility Jar Test before mixing a whole tank or contact your chemical supplier. Observe all precautions and limitations on the labels of all products used in mixtures.

CuPRO. Neither the manufacturer nor seller has determined whether or not CuPRO caTahe safely used on ornamental or nursery plants not listed on this label. The user should determine if CuPRO caTahe used safely prior to commercial use. In a small area, apply the recommended rates to the plants in question,

Palm, European
Fan
