

Ornamental Product Bulletin

Pentathlon* LF and Pentathlon* DF

Fungicide

Product Description

A broad-spectrum fungicide for effective control of fungal diseases on ornamentals.

Disease Controlled

Botrytis, Anthracnose, Cercospora, Rust, Leaf Spot, Downy Mildew, Phomopsis, Septoria, and many more.

Features	Benefits
• Broad-spectrum fungicidal activity	• Controls major diseases/pathogens affecting ornamental crops.
• Preventative, non-systemic, multi-site mode of action	• No resistance development. Excellent choice for inclusion in resistance management programs.
• Superior dry flowable and premium flowable formulations	• Easy to measure, handle and mix. Excellent tank-mix compatibility. Less dust. Water-based, won't settle out as easy.
• Excellent tenacity	• Provides rainfastness and residual activity necessary for disease control.
• Economical and effective	• Improved returns.
• No dye	• Will not stain equipment or clothing.

Suggested Use

Apply a thorough spray coverage of Pentathlon LF at 0.8 to 1.6 quarts per 100 gallons and Pentathlon DF at 1 to 2 lbs. per acre or 100 gallons. Begin when conditions favor disease development. Use higher labeled rates and shorter labeled spray intervals when disease pressure is high.
