

How It Works

Start clean: Use burndown or tillage to get your program approach off to the right start.

More options with herbicide tolerance: Plant Enlist E3[®] soybeans, or PhytoGen[®] Enlist cotton, with tolerance to 2,4-D choline in Enlist herbicides.

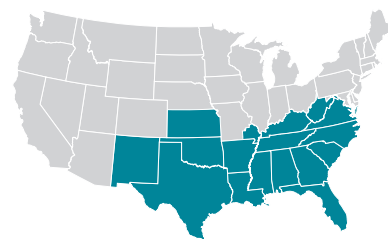

Purchase: Purchase Enlist One[®], Enlist Duo[®], and additional qualifying crop protection products for a complete weed management program from an authorized retailer from October 1, 2019 - September 30, 2020. Enlist herbicides are the only 2,4-D-containing products labeled for use with Enlist crops.

Earn your reward: Your Enlist Ahead Rewards check will be mailed to you at the end of the season.
