Obtego®

Fungicide and Plant Symbiont

Obtego Fungicide and Plant Symbiont serves as a multi-functional tool for growers by protecting the plant from damaging soil-borne pathogens and enhancing root growth.

Obtego contains two unique fungi-based active ingredients. The two species **combine to form a powerful fungicide** that is effective in a wide range of soil and environmental conditions. Obtego is highly effective against diseases such as *Pythium* spp., *Phytophthora* spp., *Rhizoctonia* spp. and more.

Obtego and plant roots live in a **mutually beneficial symbiosis**. As Obtego colonizes the root system, the Obtego fungi **promote competition and parasitism** of plant damaging pathogens in the soil. In return, Obtego stimulates development of a robust root system. The end result is a healthy, high quality plant.

Features	Benefits
Biofungicide with efficacy comparable to traditional chemistries	Reduced human and environmental risk with excellent disease control
Broad use sites	One product for indoor and outdoor use
Multiple modes of action	Minimal risk of resistance
Excellent crop safety	Applicable for all plant species
Two virulent fungal active ingredients	Maximum disease control across many environments
4-hr REI and 0-day PHI	Minimal interference with daily operations
Compatible with most fungicides	Seamless integration into any IPM program
Significant root enhancement	Substantial plant quality improvement
