

Bringing out the best management solutions for

Chrysanthemums

Product Use Guide

Proven efficacy and reliability make SePRO solutions an integral part of your pest management and PGR program this mum season. Bringing out the best, SePRO delivers the management solutions you need.

Diseases:

Botrytis

Leaf Spot

Powdery Mildew

Camelot® O Fungicide/Bactericide

Camelot O is your one-stop shop for foliar bacterial and fungal disease control. It's unique, patented copper soap formula allows for impeccable coverage and adherence with none of the globular residue seen in other copper-based products. Camelot O has a favorable 4-hour REI that especially helps when time is tight.

Decree® Fungicide

Decree has long been the industry standard for preventative and curative *Botrytis* control. Decree is in a unique FRAC group and leaves no visible residue, making it the ideal solution for *Botrytis* management.

Obtego® Fungicide and Plant Symbiont

An OMRI Listed, powerful biofungicide for propagation and liners, Obtego contains naturally occurring antagonistic fungi which prevent attacks to the roots and collar region from *Fusarium*, *Pythium*, *Phytophthora*, *Rhizoctonia*, *Rosellinia*, *Sclerotinia*, *Sclerotium rolsii*, *Thielaviopsis basicola*, and *Verticillium*.

Pipron® Fungicide

Like Decree, Pipron has long been the industry standard for curative powdery mildew control. In addition to being one of the few true powdery mildew eradicators, Pipron also leaves no visible residue.

Insects:

Mites

Thrips

Chrysanthemum Aphids

Akari® Miticide/Insecticide

All mite species. All life stages. All ornamental uses.

Hachi-Hachi® SC Insecticide

Hachi-Hachi SC is a go-to solution for broad-spectrum insect management including thrips and aphids. This unique chemistry stops-feeding immediately and is active on all life stages.

Rycar® Insecticide

A BCA friendly, translaminar insecticide providing immediate control for Whiteflies, Aphids, Leafhoppers, and Chilli Thrips.

Ornazin® 3% EC Botanical Insecticide

An Insect Growth Regulator applied as a foliar spray or drench to soil or non-soil media, Ornazin 3% EC controls insects in the larval, nymphal, and pupal stages. Listed for Aphids, beetles, fungus gnats, shore & crane flies, thrips, and many more.

Talus® 70DF Insect Growth Regulator

A BCA friendly IGR with a unique mode of action that delivers control via contact, ingestion, and vapor activity. Talus breaks the life cycle of whiteflies, mealybug, leafhopper, and scale.

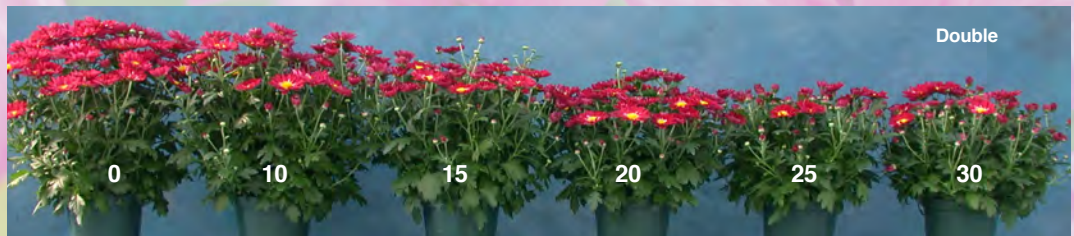

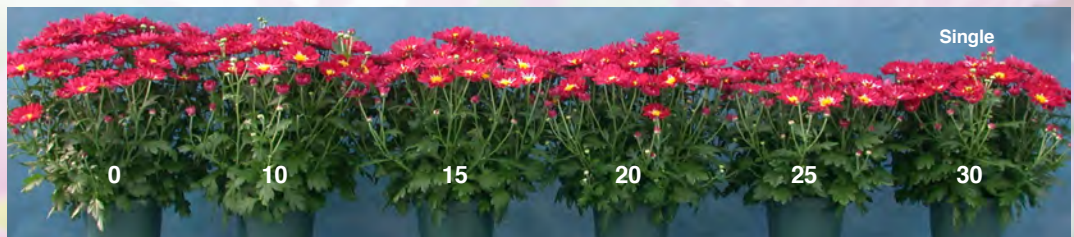

Growth Regulation:

Topflor® Ornamental Plant Growth Regulator

Applied as a drench or a spray, Topflor is a versatile PGR to produce beautiful mums without impacting flowering.

Topflor spray on mums

Applied 2 weeks after pinch. Single application at 20 - 25 ppm performed best. Two apps is not needed.

Applied 2 weeks after pinch. 25 ppm Topflor spray performed similar to 7.5 and 50 ppm of Sumagic and Bonzi, respectively.
