

Cutrine® Plus G

Granular Algaecide

Algae control from bottom to top.

- Controls filamentous & benthic algae
- More effective than copper sulfate
- Ideal for bottom growth
- Targets the problem

General Use Guide*

lbs. / 1,000 sq ft	lbs. / acre
1.5	60

*Visit with a SePRO Technical Specialist for information, rates assume < 5 foot average depth.

Application Tips:

Mix and apply with a spreader or hand scoop to desired area. For use in residential ponds and small lakes to control underwater, stringy-filamentous algae.

Granular products sink to control targeted problematic species, providing a more efficient uptake of the product. It sinks rapidly, then the chelated copper is released over time for optimal algae control.

Features:

- Rapid sinking granules target bottom-growing algae
- Visible results in algae growth 1 – 2 days after application
- Effective on Hydrilla
- Chelating agents prevent the precipitation of copper
- Idea for algae on bottom – use Cutrine Plus for surface algae
