

# Cutrine<sup>®</sup> Plus

## Algaecide

## Take down planktonic & filamentous algae.

- Controls broad range of algae
- Fast results after application
- Ideal for surface growth

### General Use Guide\*

gals/acre-foot

Planktonic Algae	Filamentous Algae
0.6 - 1.5	1.5 - 3.0 & above

\*Visit with a SePRO Technical Specialist for information. Rates differ for target species.

### Application Tips:

In still or slow waters, dilute the product with enough water to ensure even distribution and spray onto the treatment area. For broader spectrum plant and algae control, tank mix with other herbicides. The product can also be applied via drip system in flowing waters.

For use in: lakes; potable water reservoirs; ponds; fish hatcheries and raceways; crop and non-crop irrigation conveyance systems (ditches, canals, and laterals).

### Features:

- Visible results in algae growth 1 – 2 days after application
- Double chelated formula prevents the precipitation of copper
- Works in 'hard' water
- Idea for algae on surface – use Cutrine Plus Granular for deeper waters or bottom-growing algae
