

# Aquashade® Plus

## Aquatic Dye

## Not all dyes are created equal!

- 2.4x more concentrated than the original
- Inhibits underwater weed & algae growth
- Long-lasting results

### General Use Guide\*

Most underwater plants	Shallow waters or growth within 2 feet of surface
0.8 PPM	1.5 - 2.0 PPM

\*Visit with a SePRO Technical Specialist for information.

### Application Tips:

Pour directly into water. Dispersion can be accelerated by applying in several areas around the treatment site, or allowing fountains/aerators to run. Use in conjunction with herbicides or algaecides for control of surface algae mats or shallow-water plants. For best results, apply early in the season, prior to plant germination.

### Restrictions & Regulatory Information:

Wait 1 hour before using treated water for swimming, irrigation or livestock consumption. Do not apply to water that will be used for human consumption. For use in: natural and manmade contained lakes & ponds (ornamental, recreational, fish bearing bodies) with little or no outflow of water.

### Features: *Do more with less*

- Inhibits photosynthesis under water by limiting sunlight
- Powerful control of invasive plants like hydrilla
- Choice of professional applicators
- Custom Rx's from SePRO Technical Specialist always available

**Pre-Treatment on the left;  
Post-Treatment on the right at 1ppm  
& 2ppm.**
