

# Komeen®

## Aquatic Herbicide

## Quick, broad spectrum control.

- **Faster uptake than other copper herbicides**
- **Effective even in hard water**
- **Flexibility for use around ornamentals and turf**
- **Works great with other herbicides**
  - i.e. – 2:1 ration with Littora

### Use Sites:

- Golf course ponds and slow-moving streams
- Ornamental ponds
- Retention ponds
- Industrial ponds

### Application Methods:

- Spray on the surface by boat
- Spray from shore
- Subsurface injection
- Combine with other contact herbicides for one-shot control of a broader spectrum of aquatic weeds  
(See product label for specific recommendations & precautions)

### Application Timing:

Komeen requires a minimum of 12 to 24 hours of contact with the target weeds in order to provide effective control. If the treatment has been successful, the aquatic weeds will drop below the surface of the water within 3 to 7 days after treatment. If this effect is not observed, Komeen may be reapplied 10 to 14 days after the initial application.

### Features:

- Longer shelf life with liquid formulation
- Reliable control of most nuisance weeds
- Treated weeds sink below surface within 7 days
- Custom Rx's from SePRO Technical Specialist always available
