

Aquashade[®]

Aquatic Dye

Aquashade – more than just a dye.

Not all dyes are created equal. Aquashade is more than a colorant. It also:

- Inhibits underwater weed & algae growth
- Delivers long-lasting results
- Is a precise EPA registered blend

General Use Guide*

1 gal. per 4 acre-ft (at 0.8 ppm)

*Visit with a SePRO Technical Specialist for information.

Application Tips:

Pour directly into water. Dispersion can be accelerated by applying in several areas around the treatment site, or allowing fountains/aerators to run. Use in conjunction with herbicides or algaecides for control of surface algae mats or shallow-water plants. For best results, apply early in the season, prior to plant germination.

Restrictions & Regulatory Information:

Wait 1 hour before using treated water for swimming, irrigation or livestock consumption. Do not apply to water that will be used for human consumption. For use in: natural and manmade contained lakes & ponds (ornamental, recreational, fish bearing bodies) with little or no outflow of water.

Features: *Do more with less*

- Inhibits photosynthesis under water by limiting sunlight
- Powerful control of invasive plants and algae
- Choice of professional applicators
- Most effective in water deeper than two feet
- Custom Rx's from SePRO Technical Specialist available
