

StriCore®

Herbicide

The Pre-Emptive Strike Against Weeds

A NEW Era in Weed Control for Ornamental Nurseries.

StriCore Herbicide is a novel, pre-emergent solution that targets difficult-to-control weeds, while effectively addressing resistance challenges. Whether you're managing established field nursery stock, newly transplanted field plantings, or bareground between pots, StriCore Herbicide will protect the quality and value of your plants.

First New Pre-Emergent With A New Active Ingredient In Over A Decade

NEW Solution for pre-emergent weed control

For use on bareground or field grown plants

Prevent weed resistance

Excellent plant safety

Does not prune roots

Easy tank-mix partner

Success with StriCore

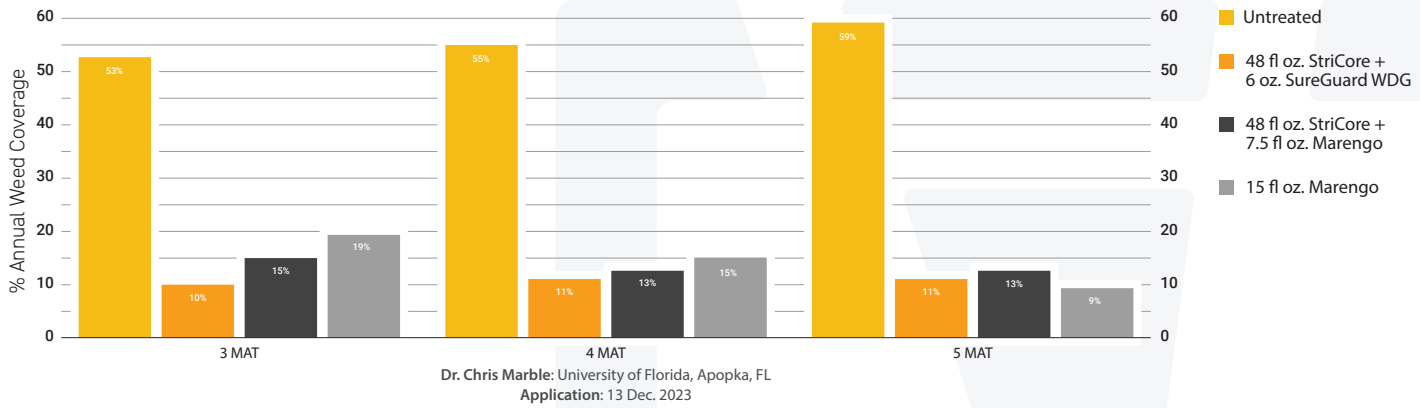

- Tank-mix StriCore with Marengo®, Gallery®, Barricade®, SureGuard®, Dimension® or Pendulum® for long-lasting, effective broad-spectrum weed control
- The underutilized mode of action in StriCore will reduce potential for weed resistance and increase spectrum of control.
- Non-staining and low odor
- StriCore Target Weeds: Bittercress, oxalis, pigweed, crabgrass, goosegrass, annual bluegrass, barnyardgrass, broadleaf signalgrass, foxtail, yellow nutsedge and more.
- 1 gallon of StriCore at 48 oz / Acre, will treat 2.67 acres

StriCore: PRE Bare-Ground in Nursery

StriCore: PRE Bare-Ground in Nursery

StriCore Tips for Success

- Start with clean, weed-free ground. If weeds have emerged, tank-mix StriCore with a post-emergent herbicide.
- Activate StriCore with at least 0.25" rainfall/irrigation in first 7 days after treatment
- Over time, Consistent moisture from rainfall or irrigation will provide greater efficacy
- Do not apply over-the-top. If StriCore makes contact with the foliage of a desirable species, use irrigation to wash it off as soon as possible.

StriCore Quick Facts

Active Ingredient	Pethoxamid
Signal Word	Warning
Re-Entry Interval (REI)	12 hours
