

# Matrix<sup>®</sup> CA

## Molluscicide

**Matrix<sup>®</sup> CA is a USEPA registered and State of California approved treatment technology for the control of the new highly invasive Golden Mussel (*Limnoperna fortunei*)**

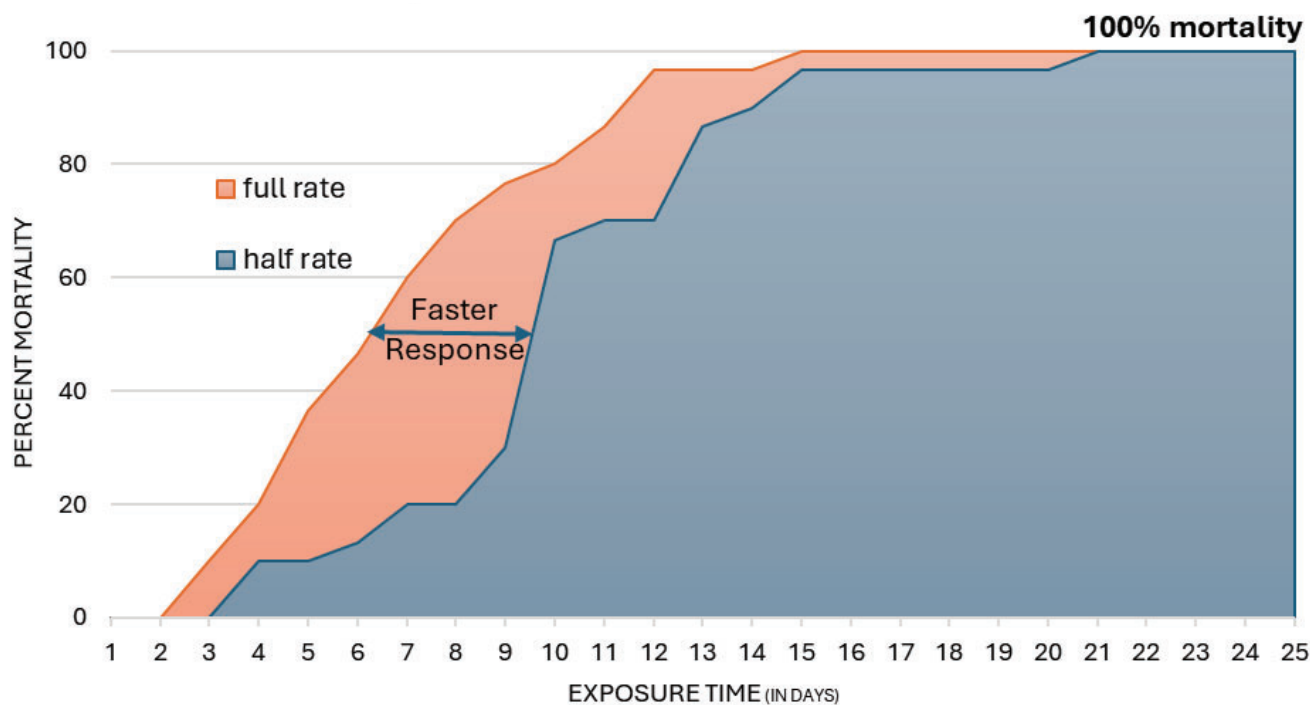

### Targeted Applications

- Labeled for a broad range of use sites
- No water use restrictions, including irrigation, livestock watering, and potable source water
- Supported by multiple independent toxicity assessments to guide treatment programs

### Effective and Economical

- 80% more concentrated than other liquid copper molluscicides
- More efficient treatments reduce time, cost and labor
- Super-concentrated formulation
- Caution signal word supports simpler handling and storage requirements

**Response of Golden Mussels to Matrix CA\***

\*Test Results from an Independent and Accredited Testing Laboratory

## Molluscicide

### Treatment Planning & Technical Support

- Consistently able to achieve complete mortality of even the largest adult Golden Mussel size class within approved label rates.
- Concentrations and exposure times can be customized based on water characteristics, mussel size class, and life stage.
- Our team can design a targeted treatment program to meet your specific water resource objectives.

### Other Key Features of Formulation

- Multiple chelating agents for increased water column stability
- Less interactive with organic matter in water or sediments
- Effective in many water types including elevated pH, alkalinity, salinity and hardness
- High product density which targets tough to reach mollusks
